Lacey Magen: Behind the scenes of an MSN assessment

00:01

Hey you guys, as many of you know, I'm a sponsored student at Capella University and I would love to share with you guys today one of the biggest reasons why I decided to go back and get my master's of science in nursing, focused in leadership and administration. And that is because I am literally able to utilize every single thing that I'm doing in my career at The Empowered Nurse, as a nurse entrepreneur in my master's program. So I am getting to tie in my career and my purpose with what I'm learning at Capella University and so today I wanted to show you a little bit of the behind the scenes of one of my assessments that I did for my program. I used all of my branding from The Empowered Nurse LLC and I got to submit a presentation based off of the work that I'm actually doing for new nurses in transition to practice in my career and use that and do research on it for my master's and for this assessment.

Lacey Magen* – Master of Science in Nursing

01:03

So I wanted to take a second to kind of show you what that presentation, "poster presentation", looked like and give you a little bit of a deeper understanding of how important it is that when you are going into furthering your education that it aligns with your career and what you want to do with the rest of your life so that you're not wasting your time or your money in doing that. Alright guys let's go check it out.

01:28

Okay so, let's take a second to look at the abstract of the poster presentation. So you can feel free to pause this at any time to actually read the abstract but basically, this was the final assessment of this course and the focus was to talk to stakeholders about why I think this program is something that needs to be something they care about as administrators or executive teams, nurse managers. Those are primarily my stakeholders. So I titled this "Changing the Face of Healthcare by Improving New Nurse Transition to Practice Experience". And this is the poster presentation so I would be taking this and this is all of my branding, all of my colors, all of my fonts, everything to those stakeholders.

02:13

The things that I would be talking to them about are quality improvement methods, evidence supporting that the new nurse mentor-ship actually works, the change strategies that we implement in The Empowered Nurse mentor-ship program and the actual benefits of the program for new nurses, for executive teams, for hospitals and all of these things are things that I'm actually utilizing in my career to grow the program and that this is something that really excites me and so it was a really easy project to do. And most of my projects and assessments throughout my master's program are just like this one.

02:49

So as you can see, if you take a quick peek at that presentation that I created for my class, you can see how well it aligns with what I'm actually doing in my career now. So like I said, I highly recommend that if you are deciding to further your education, it actually aligns with what you want to be doing with your life. Otherwise, you're going to resent it and you're not going to like it. So I am a sponsored student through Capella University and I'm super excited to be here working on something that fires me up. Bye, guys.
